## TOPCOAT

SUSTAINABLE ULTRA-CONCENTRATED ACTIVE MINERAL MICRO-FILM FINISH

### HIGH-GLOSS FINISHING LAYER

SILUM TopCoat is a high-performance finishing layer designed to maximize gloss, visual depth and protection of surfaces treated with the SILUM system.

Developed for environments where visual appearance is a priority, TopCoat delivers a rich, glossy effect while helping improve the overall resistance of the surface.

Used as an optional complementary layer within the SILUM system, it provides a superior level of finish for premium retail stores, showrooms, grocery stores and high-visibility environments.

Its formulation was designed to work in synergy with SILUM maintenance protocols, including the use of Regenerator and Hybrid.

The system also helps create an environment unfavorable to bacterial proliferation on maintained surfaces.

### KEY ADVANTAGES

- ✓ Works in synergy with the SILUM system
- ✓ High gloss and enhanced visual effect
- ✓ Richer and deeper appearance
- ✓ Additional surface protection
- ✓ Compatible with high-speed polishing
- ✓ Reduces visible soil buildup
- ✓ Helps create an environment unfavorable to bacterial proliferation
- ✓ Requires less storage space due to its high concentration
- ✓ Designed for premium image environments
- ✓ Integrates into the complete SILUM system
- ✓ Simplifies maintenance compared to conventional approaches

### SILUM SURFACE PROTECTION SYSTEM

Less work. Less waste. Better performance.

A system designed for commercial, institutional, and high-traffic environments.  
For professional use only.

### TARGET APPLICATIONS

- Premium grocery stores
- Large retail stores
- Showrooms
- Corporate buildings
- Entrance halls
- High-visibility surfaces
- VCT, polished concrete and compatible surfaces

### PRODUCT POSITIONING

TopCoat represents the ultimate finishing option of the SILUM system.

It delivers a superior level of gloss and visual presentation while preserving the operational advantages of the SILUM system.
