REGENERATOR

MINERAL REGENERATOR CLEANER

ACTIVE HIGH-PERFORMANCE MAINTENANCE SYSTEM

The SILUM Regenerator is an ultra-concentrated regenerative cleaner specifically designed to maintain and optimize the performance of the SILUM system. Unlike conventional cleaners, it does more than simply clean the surface: it actively contributes to maintaining mineral protection and floor appearance.

Developed for commercial, institutional and high-traffic environments, the Regenerator helps reduce soil buildup, limit traffic marks and maintain the visual stability of treated surfaces.

Its concentrated formulation allows very low usage rates while maintaining excellent cleaning efficiency. Compatible with autoscrubbers and manual maintenance, it was designed to work in synergy with the other SILUM system components.

The product also contributes to maintaining the system's elevated pH, helping create an environment unfavorable to bacterial proliferation on maintained surfaces.

KEY ADVANTAGES

- ✓ Works in synergy with the SILUM system
- ✓ Helps maintain the system's elevated pH
- ✓ Helps create an environment unfavorable to bacterial proliferation
- ✓ Significantly reduces residue and soil buildup
- ✓ Maintains the appearance and performance of protected surfaces
- ✓ Compatible with SILUM treated surfaces
- ✓ Reduces the need for aggressive cleaning products
- ✓ Much lower operating cost thanks to its high concentration
- ✓ Requires less storage space to its ultra-concentrated formulation
- ✓ Compatible with daily commercial and institutional maintenance
- ✓ Significantly reduces polishing dust
- ✓ More sustainable and responsible approach

SILUM SURFACE PROTECTION SYSTEM

Less work. Less waste. Better performance.

A system designed for commercial, institutional, and high-traffic environments.
For professional use only.

TARGET APPLICATIONS

- Grocery stores
- Large retail stores
- Schools and universities
- Hospitals and clinics
- Commercial buildings
- Sports facilities
- VCT surfaces and other compatible surfaces

PRODUCT POSITIONING

The Regenerator represents the modern approach to surface maintenance: fewer aggressive products, less buildup, less heavy maintenance and greater overall floor stability.

It serves as the maintenance foundation of the SILUM system.
